How can I stop CeeBot4 from using up so much of the CPU?

Posted by Jeff - 2008/08/28 22:05

I've noticed that when I run CeeBot4, the CPU usage goes to 100%, and it's CeeBot4 that's using it all. It happens even when CeeBot4 is just sitting there doing nothing. All of my other applications grind to a halt. This is unfortunate, since I often want to run other things without closing CeeBot4.

Is there any setting that will stop CeeBot4 from using up so much of the CPU?

Options, tab Graphics, to reduce CPU usage of CeeBot4. CeeBot4 is a 3D application, it can not manage its CPU usage according to real need. With these options you can reduce CPU usage a little bit, to 50% or 33%.
