Nice, free and tiny :-) I dont mind it is "a bit outdated" (16-bit-version). Can be downloaded from http://www.strukted.de/.

Thanx to Michael Bellinghausen.

It's a nice tool - with the only little disadvantage of 8.3 filenames (16-Bit)!
Last Year I found another application - available also in a single file version and it's free too:
You find the Structorzer project at: http://structorizer.fisch.lu/
